Still Orbit

CURRENT AIR

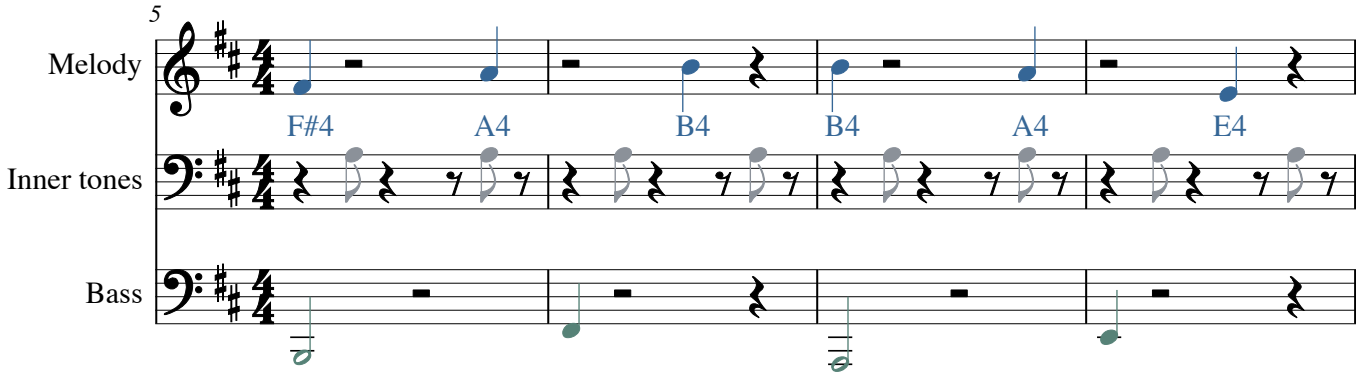

NULL | Piano study score | 4/4 | Quarter note = 60 | 96-second loop

Reading reduction: original onsets rounded to eighth notes; written lengths shortened.
Piano notes shown; the current mix also has a soft organ bed.

Bars 1-4 | 0.10-16.10 s

Bars 5-8 | 16.10-32.10 s

Bars 9-12 | 32.10-48.10 s

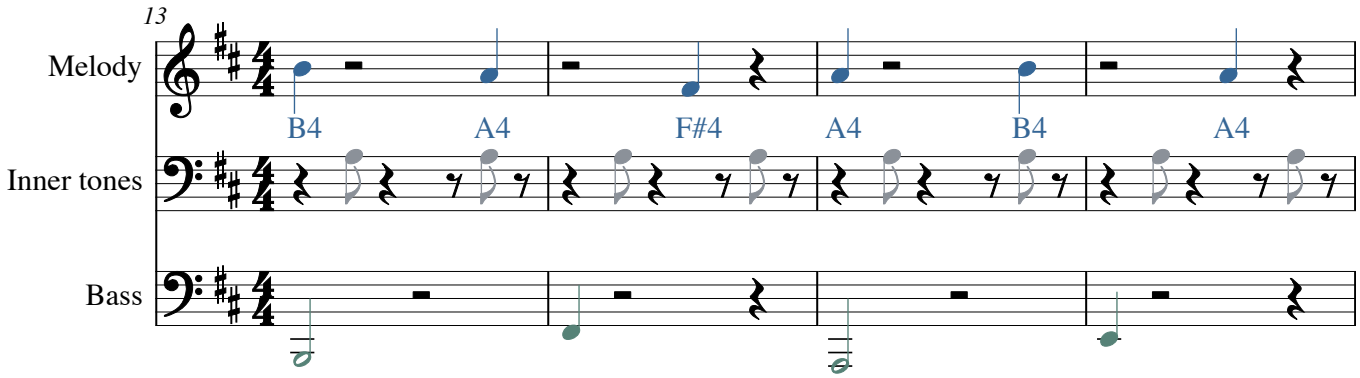

Reference signature: D major; soft organ tones are documented in the renderer.

Still Orbit

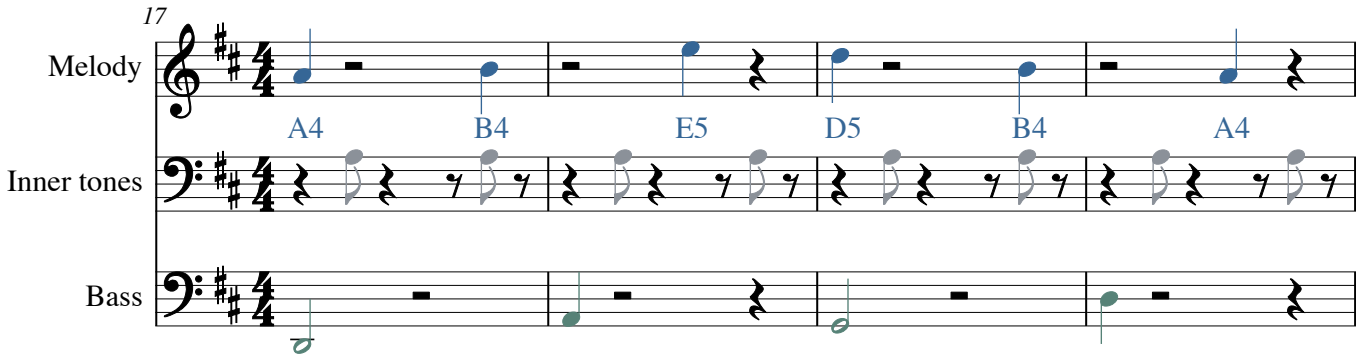

NULL | Piano study score | 4/4 | Quarter note = 60 | 96-second loop

Reading reduction: original onsets rounded to eighth notes; written lengths shortened.
Piano notes shown; the current mix also has a soft organ bed.

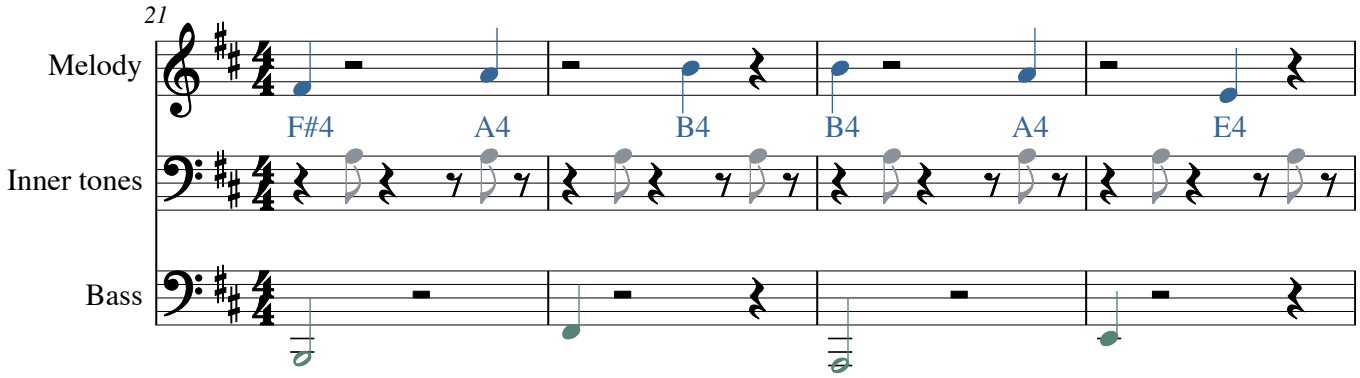

Bars 13-16 | 48.10-64.10 s

Bars 17-20 | 64.10-80.10 s

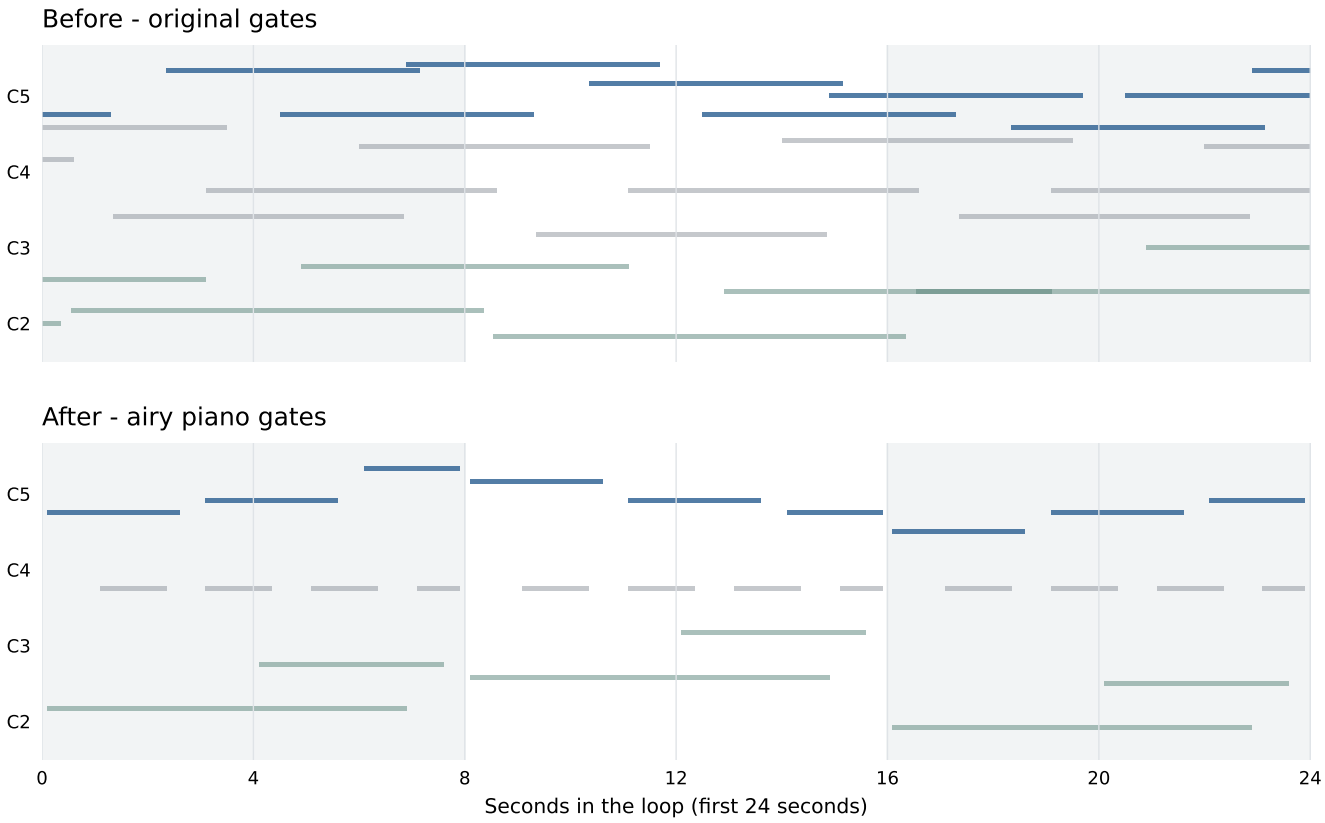

Bars 21-24 | 80.10-96.10 s

What changed

Blue = melody | Gray = inner tones | Green = bass and fifth

Bars show nominal note gates before acoustic decay/reverb. Earlier-loop tails are included.

Melodic shape

Before: 19 of 34 melody intervals jump at least five semitones.
After: 6 of 35; the A-B-E arch returns with small variations.

Room between notes

Before: melody gates last 4.8 s, with up to three melody notes overlapping.
After: 2.5 s gates with a shorter final note. Peak piano gates: 7 -> 4.

Harmonic continuity

Before: D / Bb / F / C / G / A / Eb / A / D / Bb / F / C bass roots.
After: D / G / B / A repeated three times, with a common A3 piano pulse.

Reverb

Before: 6.5 s impulse buffer; exponential decay factor 1.2; wet mix 0.23.
After: bass-filtered reverb at 0.13; soft organ bed at 12% of piano RMS.

Gate counts describe piano scheduling; organ tones and acoustic reverb are not counted.
