Still Orbit

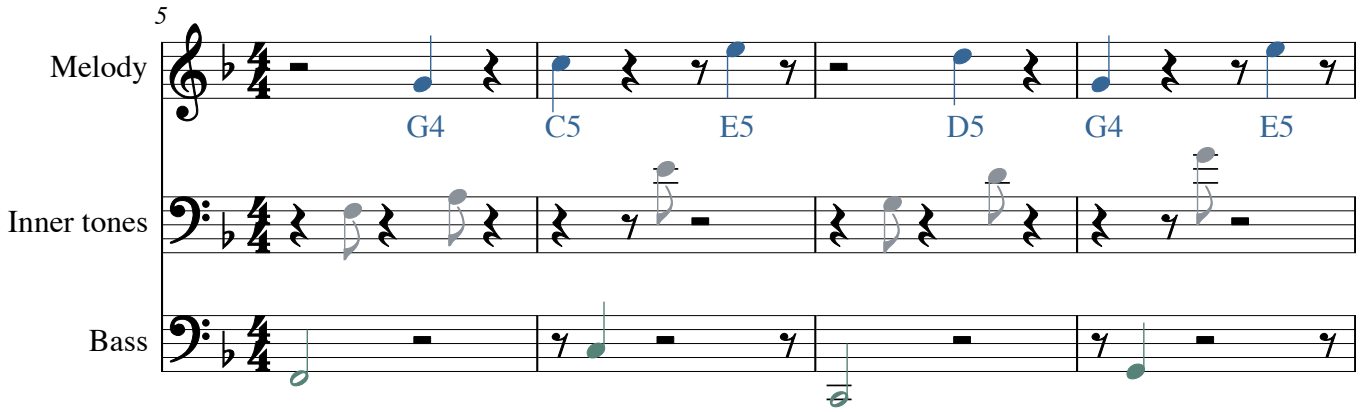

NULL | Piano study score | 4/4 | Quarter note = 60 | 96-second loop

Reading reduction: original onsets rounded to eighth notes; written lengths shortened.
Pitch names below the melody. MIDI and the final-page timing map preserve longer gates.

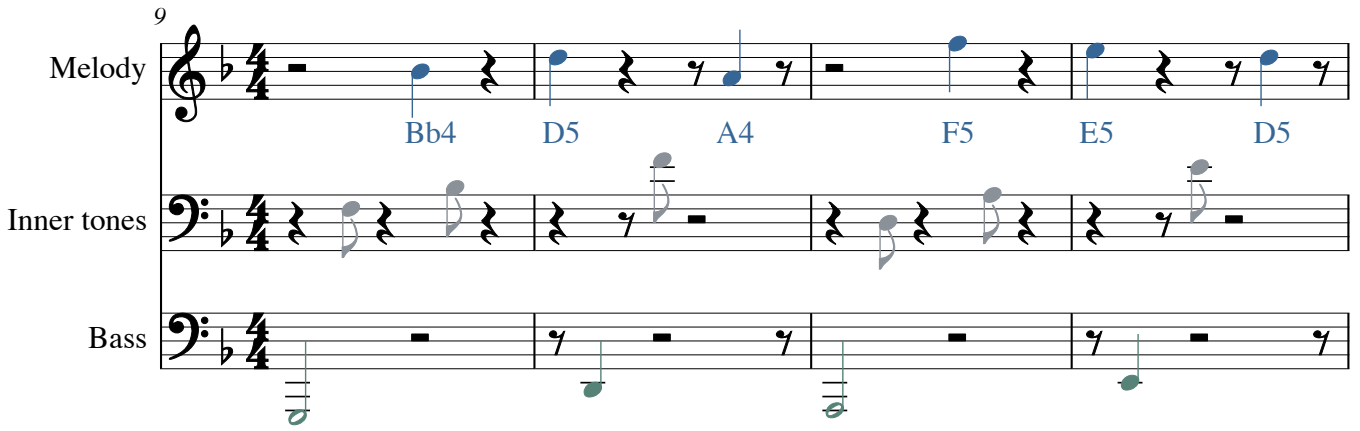

Bars 1-4 | 0.55-16.55 s

Bars 5-8 | 16.55-32.55 s

Bars 9-12 | 32.55-48.55 s

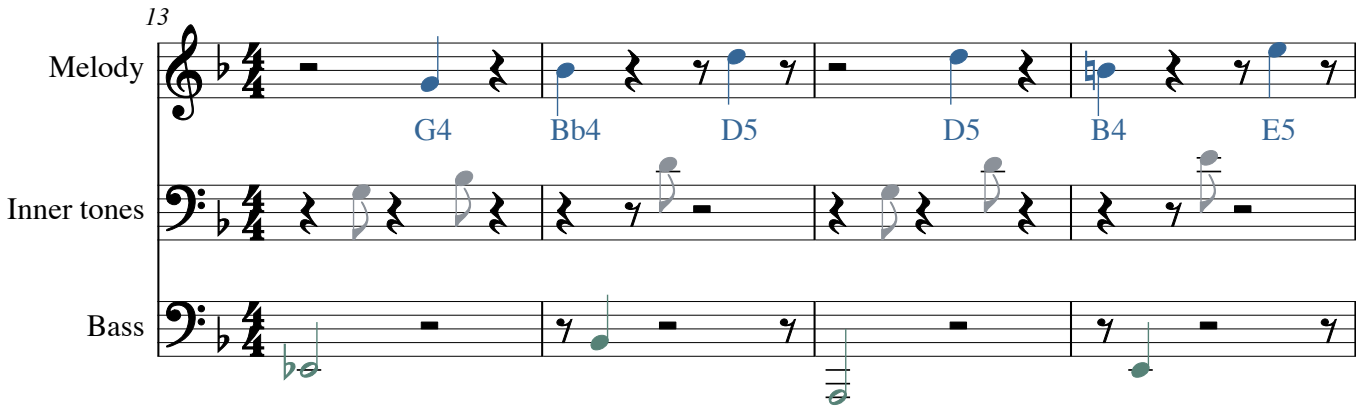

Reference signature: D minor; chromatic pitches in the original are retained.

Still Orbit

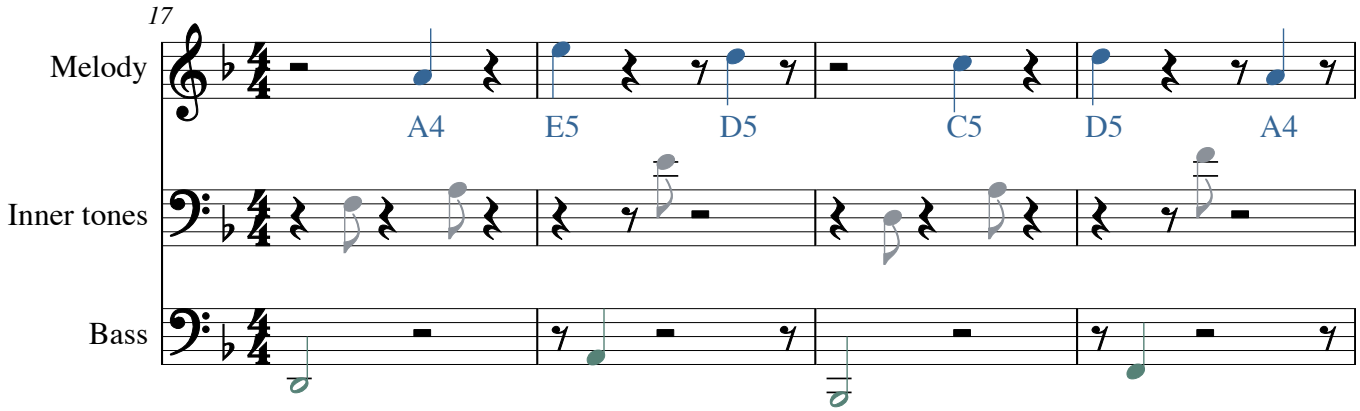

NULL | Piano study score | 4/4 | Quarter note = 60 | 96-second loop

Reading reduction: original onsets rounded to eighth notes; written lengths shortened.
Pitch names below the melody. MIDI and the final-page timing map preserve longer gates.

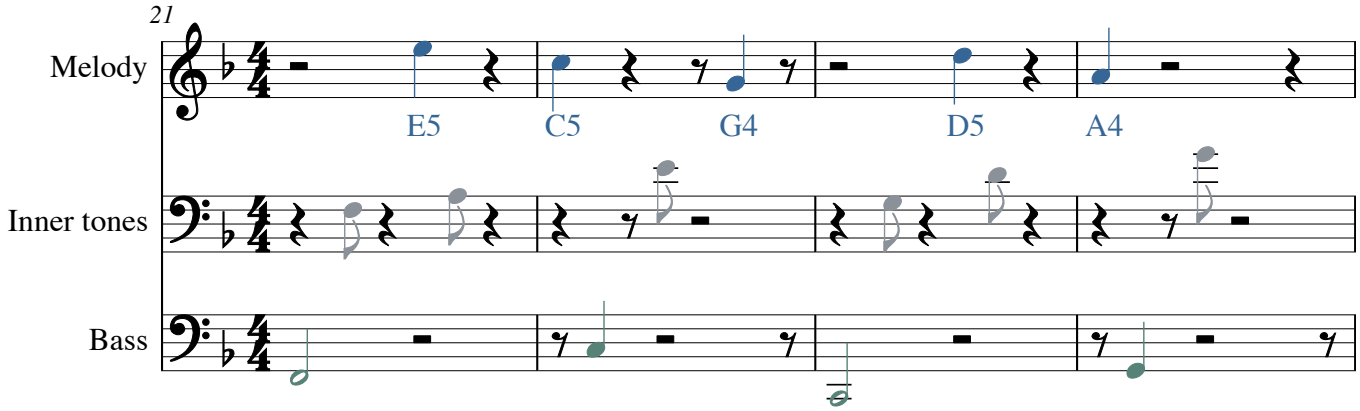

Bars 13-16 | 48.55-64.55 s

Bars 17-20 | 64.55-80.55 s

Bars 21-24 | 80.55-96.55 s

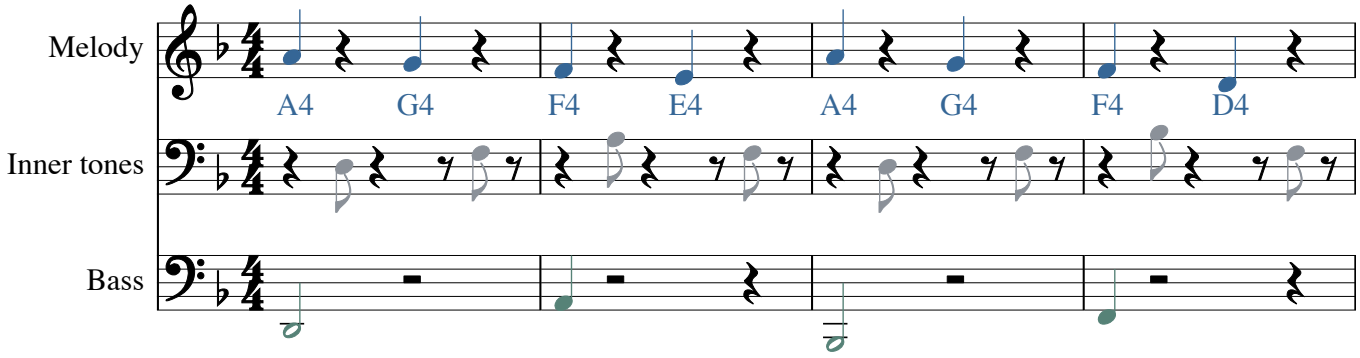

Reference signature: D minor; chromatic pitches in the original are retained.

Still Orbit

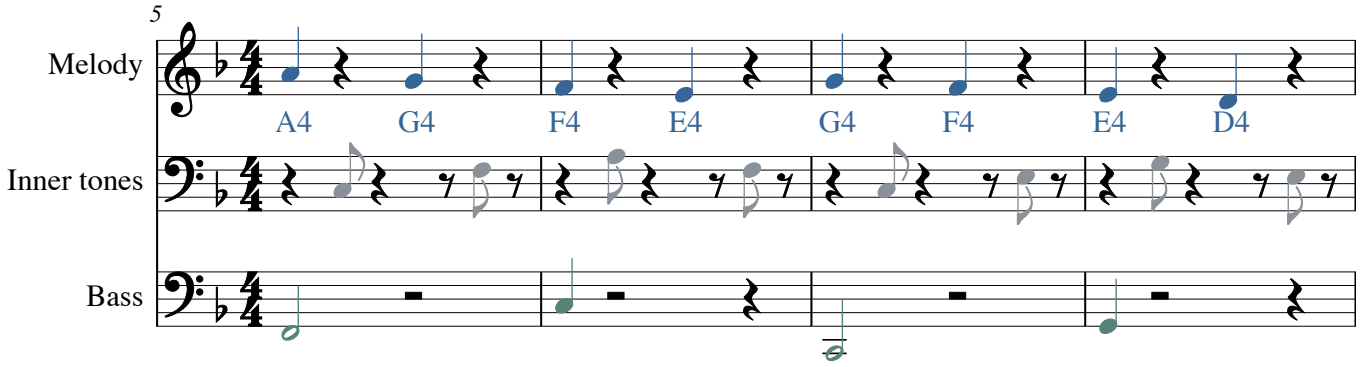

NULL | Piano study score | 4/4 | Quarter note = 60 | 96-second loop

Reading reduction: original onsets rounded to eighth notes; written lengths shortened.
Pitch names below the melody. MIDI and the final-page timing map preserve longer gates.

Bars 1-4 | 0.10-16.10 s

Bars 5-8 | 16.10-32.10 s

Bars 9-12 | 32.10-48.10 s

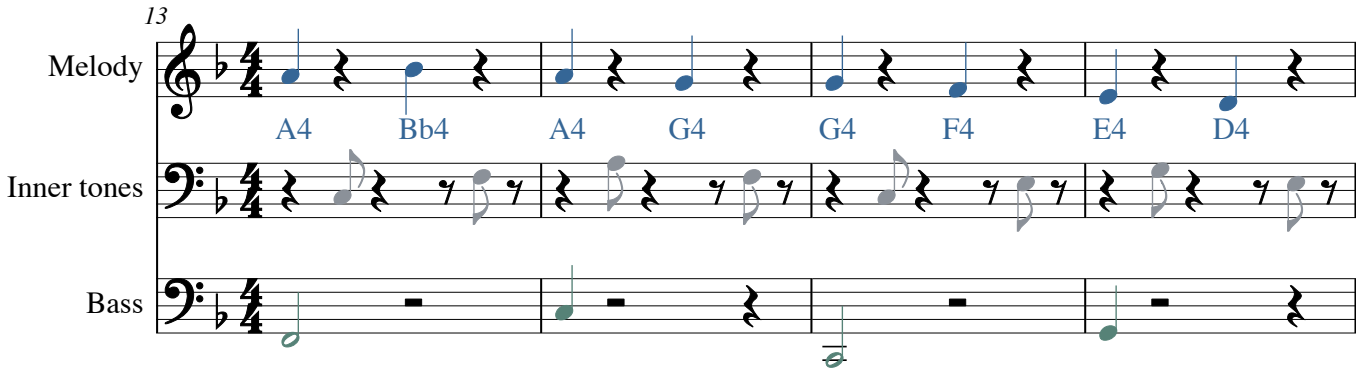

Still Orbit

NULL | Piano study score | 4/4 | Quarter note = 60 | 96-second loop

Reading reduction: original onsets rounded to eighth notes; written lengths shortened.
Pitch names below the melody. MIDI and the final-page timing map preserve longer gates.

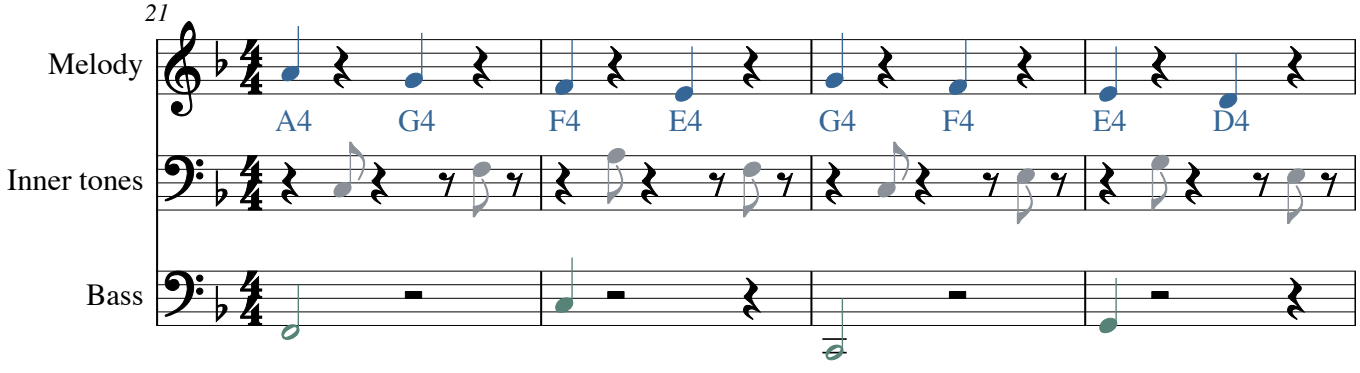

Bars 13-16 | 48.10-64.10 s

Bars 17-20 | 64.10-80.10 s

Bars 21-24 | 80.10-96.10 s

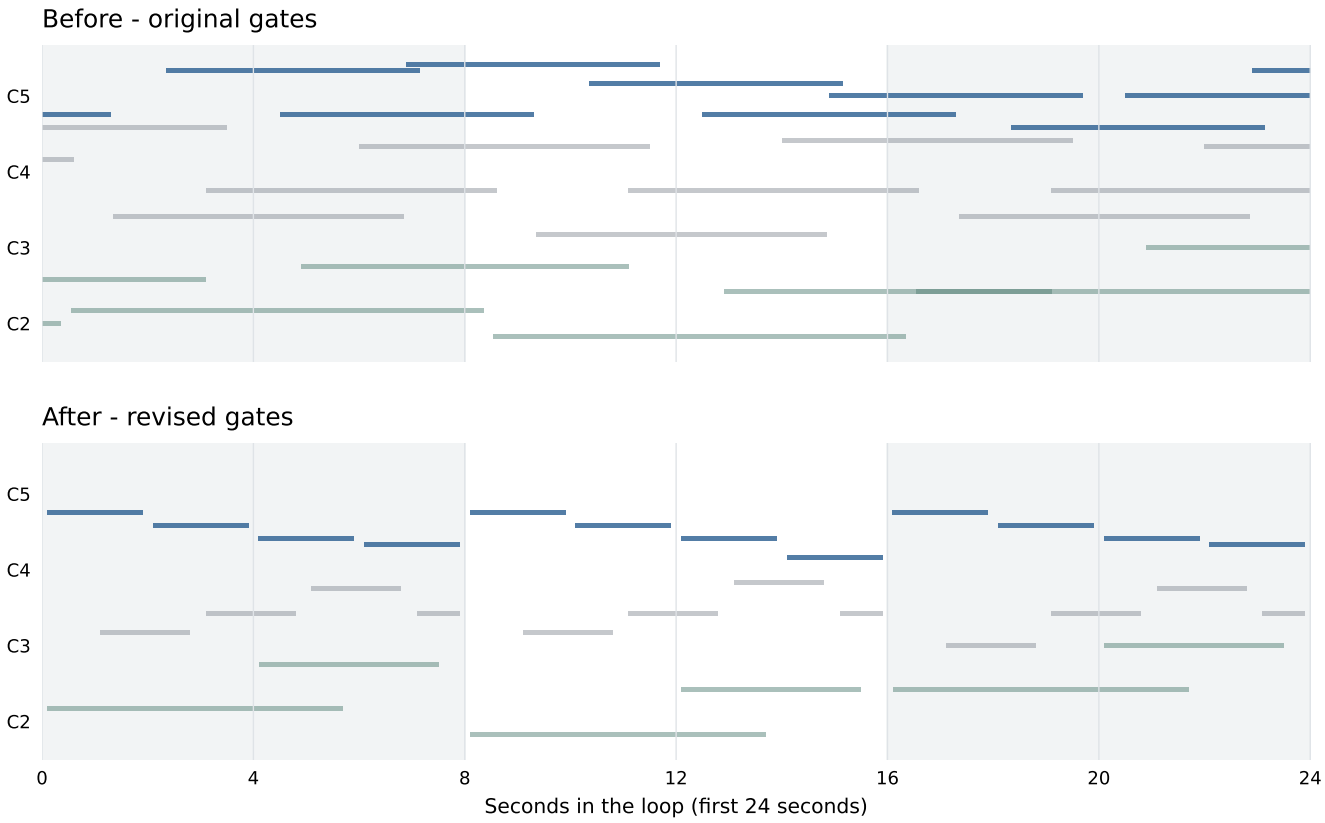

Reference signature: D minor; chromatic pitches in the original are retained.

What changed

Blue = melody | Gray = inner tones | Green = bass and fifth

Bars show nominal note gates before acoustic decay/reverb. Earlier-loop tails are included.

Melodic shape

Before: 19 of 34 melody intervals jump at least five semitones.

After: 8 of 47; the A-G-F-E motif returns with small variations.

Room between notes

Before: melody gates last 4.8 s, with up to three melody notes overlapping.

After: 1.8 s gates on a regular 2 s pulse. Peak combined gates: 7 -> 4.

Harmonic continuity

Before: D / Bb / F / C / G / A / Eb / A / D / Bb / F / C bass roots.

After: D / Bb / F / C repeated three times; no sudden Eb bass or B-natural detour.

Reverb

Before: 6.5 s impulse buffer; exponential decay factor 1.2; wet mix 0.23.

After: 4.0 s buffer; faster decay factor 2.6; lower wet mix 0.14.

Gate counts describe synthesis scheduling, not equally loud sustained notes.
